Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hume et al.

Hume et al (US 5,542,857) disclose a light socket apparatus comprising:

a quick release socket (44) comprising two electrical contact posts (48) electrically connected to a light bulb attachment means (60);

a quick release base (64) comprising two electrical contact slots (72, 76) electrically connected to two electrical input posts (not shown elements electrically connected to 76); and

said two electrical contact posts of said quick release socket electrically connected said two electrical contact slots of said quick release base.

Claim1 is rejected under 35 U.S.C. 102(b) as being anticipated by Reedy.

Reedy (US 4,804,343) disclose a light socket apparatus comprising:

a quick release socket (54) comprising two electrical contact posts (112, 118) electrically connected to a light bulb attachment means (94,92);

a quick release base (15) comprising two electrical contact slots (94,96) electrically connected to two electrical input posts (144); and

said two electrical contact posts of said quick release socket electrically connected said two electrical contact slots of said quick release base.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2833

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hume et al in view of Jones et al.

Hume et al disclose all of the limitations except for the light bulb attachment means being designed to accommodate an MR-16 lightbulb.

Jones et al (US 6,053,623) disclose the light bulb attachment means (30) being designed to accommodate an MR-16 lightbulb.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide Hume et al with the light bulb attachment means, as taught by Jones et al, to utilize the quick connection of MR-16 bulbs.
